

# RE-ENTRY AND RESILIENCY PLAN UPDATE: OUTCOMES & MONITORING

Carlow University's Re-Entry and Resiliency Plan continues to ensure all students, employees and our community are healthy, safe, and engaged. Throughout the pandemic, an active COVID-19 Reentry and Resiliency Leadership Team remained engaged to monitor, evaluate and implement protocols for continued University operations to maintain a safe, productive, successful learning environment and workplace.

Our current health and safety protocols pivots include:

+ In August 2021, Carlow initiated a proof of vaccination status disclosure process for faculty, staff and students.

+ **December 17th Deadline for Reporting Employee and Student Vaccination Status:** Numerous reminders have been provided regarding the requirement for everyone to provide their vaccination status by December 17th. There will be consequences for not meeting this requirement that will take effect if employees/students miss this deadline.

+ In August 2021, Carlow implemented a mask requirement for all indoor spaces on campus. All individuals, regardless of vaccination status, are required to always wear properly fitting masks indoors. Individuals are not required to wear a mask while outdoors on campus or inside campus buildings where they are alone in a self-contained space, such as an office or study room. This policy extends to all indoor spaces, including dining areas except when eating or drinking, owned, or operated by the University.

+ Vaccine Requirement Status:

- Weekly Student Communications on Thursday

- The University has been notified that all Carlow faculty and students in any programs that use AHN for practicum or internship sites will need to provide confirmation of COVID-19 multi-dose vaccination by January 4, 2022. Please consult your advisor or clinical supervisor for details if you feel this may pertain to you.

- All Employees as well as any Students who are not fully remote will be required to be fully vaccinated by January 24, 2022.

- Vaccination cards must be submitted showing completion of receiving the necessary vaccine dosage.

- Required: Weekly Testing for Individuals with Medical and Religious Exemptions: For individuals who have been granted an exemption, it will be necessary to produce a weekly negative COVID test result not more than 72 hours old. It will be necessary to make your own arrangements for weekly testing and any payments required.

+ The University Dashboard was revised to capture the cases from September 2020 to August 2021 and update the Fall 2021 cases in efforts to remain transparent about COVID-19 infection rates among our campus community.

+ See dashboard below as of 11/29/21. Direct link found on Carlow website at:

<https://www.carlow.edu/covid-19/campus-dashboard/>

This dashboard began on August 1, 2021 and is updated daily Monday – Friday.

<b>Metric</b>	<b>New this week</b>	<b>Cumulative</b>
Positive Cases Identified	1	39
Employees	0	5
Students		
– Residential Students	0	7
– Commuter Students	1	27
Student Quarantine Spaces in Use	0	

This dashboard shows laboratory-confirmed cases reported to the University involving students, faculty and staff who were on-campus during the time they were contagious.

The dashboard does not include cases among individuals studying/working remotely or those who have not been on campus.

## Vaccination data

This dashboard began on October 18, 2021 and is updated weekly on Mondays.

<b>Metric</b>	<b>Total</b>
Employees who are confirmed to be vaccinated	79%
Employees who are confirmed to be unvaccinated	5%
Employees whose vaccination status is not known*	16%
Students who are confirmed to be vaccinated	65%
Students who are confirmed to be unvaccinated	15%
Students whose vaccination status is unknown	20%

\*Employees who submitted their vaccination status did so voluntarily. Carlow University has not required employees to submit their vaccination status, though it was strongly encouraged.

Please note: the data presented in this dashboard is subject to change as Carlow University continues to encourage students and employees to submit their vaccination status. Carlow University will update this table regularly as additional statuses become known to the University.
