

BECOME A DOCTOR OF PHYSICAL THERAPY

Join a diverse group of aspiring physical therapists in a deep and experiential learning journey that accelerates your career readiness. Our expert team has uniquely designed a well-rounded, team-based, hands-on PT curriculum geared toward treating patients beyond their disease to improve functional outcomes.

HEALTHCARE TEAM MODEL

Learn and discuss with aspiring nurse practitioners, occupational therapists, physician assistants, and speech-language pathologists. In the field, this is referred to as interprofessional collaboration, and Carlow has uniquely built it in to your learning to enhance your career-readiness.

HOLISTIC APPROACH TO MASTERING PT KNOWLEDGE AND SKILLS

Our well-rounded, hands-on curriculum puts equal emphasis on technical and non-technical skills including the three important habits of healthcare practice: the heart (professional formation/responsibilities), the head (cognitive knowledge) and the hand (clinical skills). Our curriculum will teach physical therapy knowledge and skills from the lens of humanism. An on-campus simulation lab will also enhance the learning experience, making for a seamless transition from classroom to workplace.

CLINICAL EXPERIENCES

You will have the opportunity to gain clinical experiences in a variety of healthcare settings and among different age groups on Carlow University's campus, in Pittsburgh, around the U.S. and internationally.

LOCK IN YOUR TUITION

As an incoming (Fall 2023) PT student you are eligible to lock in your per-credit tuition rate for your whole program duration!
