EXECUTIVE SUMMARY

2026-2028 STRATEGIC PLAN

Academic Years 2025-2026, 2026-2027, 2027-2028

SLP Program Mission

The mission of the Speech-Language Pathology Program is to offer an innovative interprofessional learning environment that empowers new leaders in speech-language pathology to excel as evidence-based, compassionate, and responsible clinicians in creating a just and merciful world.

SLP Program Vision

The Speech-Language Pathology Program seeks to be a leader in innovation and transformational educational opportunities by providing exceptional training within a diverse, interprofessional, collaborative learning environment.

SLP Program Goals

1. Equip students with the knowledge and skills needed for entry-level professional practice in speech-language pathology.
2. Establish an innovative, high technology learner-centered curriculum that promotes the development of critical thinking and evidence-based clinical practices.
3. Provide a strong interprofessional teaching-learning environment whereby students use cross-disciplinary partnerships to guide clinical decision-making.
4. Foster a person-centered professional practice climate of mutual respect, professionalism, ethical accountability, self-reflection, and life-long learning.

Strategic Planning Process

The Speech-Language Pathology Program's Strategic Plan was designed to align with the Strategic Plan of the University and the College of Health and Wellness. The Mission and Goals of the University, College of Health and Wellness, and Program were the guiding documents in formulating the Speech-Language Pathology Program's Strategic Plan. The Strategic Plan will serve as a guiding document for all aspects of the program.

Strategic Plan Review & Evaluation

All program faculty and members of higher levels of administration have the opportunity to review the plan and suggest revisions. Evaluation of outcomes pertaining to the strategic plan is conducted annually. To ensure that the strategic plan reflects the role of the program within the community, input from an Ad Hoc Community Advisory Board comprised of area clinical educators and interdisciplinary stakeholders is sought out annually, at minimum.
